INTRODUCTION

This pamphlet contains entries on 5057 awards of the Distinguished Service Cross for World War II. In terms of completeness and accuracy this represents a significant improvement over the original edition published in 1988. However, there undoubtedly are several dozen additional awards that still have not been identified and 143 on the current list that have not been verified from primary sources, as explained below.

How to Read the Entries: The format is a single line entry for each award, whether an initial award or an additional award to the same person (usually identified as an Oak Leaf Cluster). The listing is alphabetical for each of the nine categories of personnel, and each entry is in a standard six element format. Each entry begins with a name and ends with a source code. Other information is listed when known and to the extent that space permits. Below is an idealized, hypothetical example:

ADAMS, John J. Sgt (PFC) E/1st Inf 1 Aug 44 (P) 77/44ETO

Each of the six elements is described below:

Name - usually as given in the general orders announcing the award.

Rank - usually as given in the general orders and reflecting rank at time the orders were published. If a different rank was stated for the date of the action, this follows in parentheses.

Unit and/or organization - taken from general orders if stated, otherwise from secondary sources, reflects assignment as of date of action. For ground force personnel the lowest known unique unit/organization is stated. For example, when recipient is known to have been in E Co, 1st Inf Regt, 6th Inf Div, only company and regiment are listed. For AAF personnel, group is listed when known, rather than squadron.

Date - date(s) of action as stated in general orders or taken from other sources if not contained in the orders.

Special status - when known, (P) is used to indicate a posthumous award, (MIA) to indicate award to a person in Missing in Action status, (POW) to indicate award to a person in Prisoner of War status, and (OLC) to indicate the general orders indicated the award was an Oak Leaf Cluster in lieu of a second or subsequent DSC award.

Source code - General Orders number, followed by slash, followed by last two numerals of year, followed by a code indicating the headquarters that published the orders. In the above example, the award was announced in General Orders 77 of 1944, published by Headquarters, European Theater of Operations, US Army. If the general orders have been identified in secondary sources, but not verified, the code is in parentheses. If no general orders have been identified, a code in parentheses indicates a secondary source.

Well over 100 published sources were consulted in the preparation of the DSC award listing. The above listing of secondary sources includes only those which formed the basis for award listings that thus far have not been confirmed by orders announcing the awards. The above references and many others have been used to provide information in the listings that was not included in orders such as units and dates of actions.

Of the 143 awards that have not been confirmed by examination of actual general orders, 77 are based on secondary sources, generally published official and unofficial histories. The other 66 also came from secondary sources, but the actual general orders were specified and have been listed in the source code position, but in parentheses. Thus far these orders have not been located or when located had no DSC awards. Most of these should eventually prove to be valid, though the indicated headquarters are probably misstated in several cases.

The award to Pvt William O. Jordan of the 24th Inf Div deserves special note. This award was published in GO 404, 1945, Hq, US Army Forces, Pacific; then revoked in GO 194, 1946 of the same headquarters. In all other know cases where a revocation has occurred, this has been due to a later award of the Medal of Honor for the same action, when duplicate DSC awards had been made for the same action by two headquarters, or to permit republication of a substantially revised citation. It is possible that the Jordan award was revoked due to receipt of information which, had it been known earlier, would have caused no award to be made. However, the Jordan award is listed in the 24th Inf Div history and for the time being it must be given the benefit of the doubt. No other awards that are known to have been revoked appear in the listing.

The compilers of this listing are most interested in hearing from anyone who can provide information on additional awards or correct or supplement the information on any of the current entries. Particularly useful would be copies of actual general orders for those cases where orders thus far have not been located. Contact either:
